

Great Food Processor, only \$100

I'm not sure how long this deal will last, but if you need a new food processor, or don't have one yet, Amazon is selling this [Cuisinart food processor](#) for \$80 off its list price, a savings of 44%. This is the same model I've used since 2005, and I have no complaints about it. It works great, and this is a great, great price.
